## ABOUT ME

I graduated with honors from the university. For 8 years of work in the specialty, he has achieved high results, both personal and professional. Successfully completed Java courses. I really liked this language of programming, as well as the field of programming. Also I have B1 level English and continue to learn in Underground English school. I would like to move further in this direction and achieve high results. By myself, I am a sociable person, purposeful, I like to work in a team. In my spare time from work and study I go in for sports.
